Dec 21, 2020 Version 2.8.2 Updated scanner to check your tickets and entries in the Happiness Area. I've had the app for years and I've always liked it. It seems that it may have been updated recently because I noticed that the scanner is different in the app now. The scanner's terrible. I have to try to scan her more often. Sometimes I give up and just go to the website and look at the winning numbers. But before this update, the scanner always worked perfectly. I like the app, but they have to do something about the scanners. ☹️ think everyone knows this scanner is a bomb. You can scan tickets and if you have kids who like to scratch your tickets, you can leave losers tickets to scratch them. If you're little kids like me. Little kids like to scratch until there's no more numbers on it, so I let them scratch until their heart shings, when they bring it to me, I say you've got a dollar and they're so happy. The barcode scanner was on target until the last two updates. Now it barely works, and when you have to stand in the corner with one foot up, keep your mouth right while juggling an orange. Stop matching a good app. Why programmers think they need to constantly improve on something is beyond me. If it works effectively, leave him alone. The rest of the application is fine, but the scanner is useless. I hope they fix it soon. Otherwise, I'm going to have to keep driving to the dealer to check the tickets.
